

1-HOUR WEBINAR

Results of a side-by-side comparison of two generic PROMS: VR-12 and EQ-5D-5L

Learning objectives:

- Interpret different types of summary scores obtained from VR-12 and EQ-5D-5L data
- Compare strengths and limitations of VR-12 and EQ-5D-5L summary scores for different purposes
- Understand which PROM to select for different purposes

SPEAKER

Jae-Yung Kwon RN, PhD

Assistant Professor in the School of Nursing at the University of Victoria

This webinar is offered as part of Dr. Kwon's post-doctoral fellowship with the BC Office of Patient-Centred Measurement (BC OPCM) and the Trinity Western University School of Nursing with funding from the BC SUPPORT Unit.

The purpose of the webinar is to provide guidance on the use of two commonly used generic patient-reported outcome measures (PROMs) in patient-centred measurement health surveys: The VR-12 and the EQ-5D-5L. Dr. Kwon will present results of his comparative analysis of both PROMs using BC OPCM survey data, linked with administrative health data.
